

tesseract\_collision  
::ConvexDecomposition

```
graph BT; A["tesseract_collision::ConvexDecompositionVHACD"] --> B["tesseract_collision::ConvexDecomposition"]
```

The diagram illustrates an inheritance relationship between two C++ classes. At the bottom is a grey-shaded box representing the base class, `tesseract_collision::ConvexDecompositionVHACD`. A blue arrow points vertically upwards from this box to a white box at the top, which represents the derived class, `tesseract_collision::ConvexDecomposition`. This visualizes that `tesseract_collision::ConvexDecompositionVHACD` inherits from `tesseract_collision::ConvexDecomposition`.
